

MERLIN

450

This is an engine designed for the sports-minded. The person who wants that little extra out of an engine—quick responsive acceleration combined with rugged reliability.

POWER BY FORD

ADVANTAGES OF THE MERLIN DIESEL ENGINE

- The world's most powerful 450 HP production diesel engine based on: Power to weight ratio: 3.05 Lb./HP.
- Lighter weight, compact design provides easier service access and higher vessel performance.
- Heavy duty engine mounts are standard.
- Self-purging fuel system will not allow dirty fuel into injector pump.
- Hoses or hose clamps are not used for the cooling system—only 316L SS tubing.
- Fuel and oil lines are all aircraft type braided stainless steel.
- All serviceable components can be removed or reinstalled in 5–10 minutes with standard American tools.
- Single belt on engine driven alternator.
- Unprecedented acceleration and top speed.
- Ability to run at top speeds without engine overheating.
- Fuel savings up to 70% compared to gas engines of equal output.
- Engine life with scheduled maintenance and overhaul will typically exceed the useful life of the boat.
- Much greater reliability. Diesel fuel provides enormous safety advantage.
- Much lower maintenance cost.
- Excellent parts availability.
- Available w/extended warranty up to 5 years.
