# **SAFETY DATA SHEET**

Energrease EP 2

### Section 1. Identification

GHS product identifier	Energrease EP 2	
Product code	469944-ZA01	
SDS no.	469944	
Relevant identified uses of the	e substance or mixture and uses advised against	
Use of the substance/ mixture	Grease for industrial applications For specific application advice see appropriate Technical Data Sheet or consult our company representative.	
Manufacturer		
Supplier	BP Southern Africa (Pty)Ltd 199 Oxford Road Oxford Parks Dunkeld, 2196 South Africa	
	Product Technical Helpdesk: 0800 111 551	
EMERGENCY TELEPHONE NUMBER	Tygerberg Poison Centre: 0861 555 777 Carechem: +27 21 300 2732 (24/7)	
Section 2. Hazards	identification	
GHS Classification	SERIOUS EYE DAMAGE/EYE IRRITATION - Category 1 SHORT-TERM (ACUTE) AQUATIC HAZARD - Category 3 LONG-TERM (CHRONIC) AQUATIC HAZARD - Category 3	
GHS label elements		
Hazard pictograms		
Signal word	Danger	
Hazard statements	H318 - Causes serious eye damage. H412 - Harmful to aquatic life with long lasting effects.	
Precautionary statements		
Prevention	P280 - Wear eye or face protection: Recommended: safety glasses with side-shields P273 - Avoid release to the environment.	
Response	P305 + P351 + P338 + P310 - IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a POISON CENTER or physician.	
Storage	Not applicable.	
Disposal	P501 - Dispose of contents and container in accordance with all local, regional, national and international regulations.	
Other hazards which do not result in classification	Defatting to the skin. Note: High Pressure Applications Injections through the skin resulting from contact with the product at high pressure constitute a major medical emergency. See 'Notes to physician' under First-Aid Measures, Section 4 of this Safety Data	

## Section 3. Composition/information on ingredients

Mixture

Substance/mixture

Highly refined base oil (IP 346 DMSO extract < 3%). Soap. Proprietary performance additives.

Product name Er	ergrease EP 2	Product code 469944-ZA01	Page: 1/8
Version 2	Date of issue 10/03/2020.	Format GHS - South Africa	Language ENGLISH
		Build 6.1.0 (GHS - Default)	(ENGLISH)

### Section 3. Composition/information on ingredients

occubility. Composition/mornation on ingreatents		
Ingredient name	%	CAS number
Base oil - unspecified	≥50 - ≤75	Varies - See Key to abbreviations
Distillates (petroleum), hydrotreated heavy naphthenic zinc bis[O-(2-ethylhexyl)] bis[O-(isobutyl)] bis(dithiophosphate)	≥10 - ≤25 ≤5	64742-52-5 26566-95-0
N-alkylated benzotriazoles, (Isomers - mixture)	≤0.3	94270-86-7
		(80584-90-3 / 80595-74-0)

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

#### Section 4. First aid measures

Description of necessary first a	id measures	
Eye contact	In case of contact, immediately flush eyes with plenty of water for at least 15 minutes. Eyelids should be held away from the eyeball to ensure thorough rinsing. Check for and remove any contact lenses. Get medical attention immediately. Chemical burns must be treated promptly by a physician.	
Inhalation	If inhaled, remove to fresh air. Get medical attention immediately.	
Skin contact	Get medical attention immediately. In case of contact, immediately flush skin with plenty of water for at least 15 minutes while removing contaminated clothing and shoes. Wash skin thoroughly with soap and water or use recognised skin cleanser. Wash clothing before reuse. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. Clean shoes thoroughly before reuse. Chemical burns must be treated promptly by a physician.	
Ingestion	Do not induce vomiting unless directed to do so by medical personnel. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Get medical attention immediately. Chemical burns must be treated promptly by a physician.	
Protection of first-aiders	No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves.	
Most important symptoms/effect	cts, acute and delayed	
See Section 11 for more detailed	information on health effects and symptoms.	
Indication of immediate medica	l attention and special treatment needed, if necessary	
Specific treatments	No specific treatment.	
Notes to physician	Treatment should in general be symptomatic and directed to relieving any effects.	
	Note: High Pressure Applications Injections through the skin resulting from contact with the product at high pressure constitute a major medical emergency. Injuries may not appear serious at first but within a few hours tissue becomes swollen, discoloured and extremely painful with extensive subcutaneous necrosis. Surgical exploration should be undertaken without delay. Thorough and extensive debridement of the wound and underlying tissue is necessary to minimise tissue loss and prevent or limit permanent damage. Note that high pressure may force the product considerable distances along tissue planes.	

## Section 5. Firefighting measures

Extinguishing media	
Suitable	In case of fire, use water fog, alcohol resistant foam, dry chemical or carbon dioxide extinguisher or spray.
Not suitable	Do not use water jet.
Specific hazards arising from the chemical	✓ re water contaminated with this material must be contained and prevented from being discharged to any waterway, sewer or drain. This material is harmful to aquatic life with long lasting effects.

Product name En	ergrease EP 2	I	Product code	469944-ZA01	Page: 2/8
Version 2	Date of issue 10/03/2020.	Forma	t GHS - South	Africa	Language ENGLISH
		Build 6.1.0	(GHS - Defau	lt)	(ENGLISH)

## Section 5. Firefighting measures

Hazardous thermal decomposition products	Combustion products may include the following: phosphorus oxides metal oxide/oxides carbon oxides (CO, CO <sub>2</sub> ) (carbon monoxide, carbon dioxide) sulphur oxides (SO, SO <sub>2</sub> , etc.)
Special precautions for fire- fighters	No action shall be taken involving any personal risk or without suitable training. Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire.
Special protective equipment for fire-fighters	Fire-fighters should wear positive pressure self-contained breathing apparatus (SCBA) and full turnout gear.

# Section 6. Accidental release measures

Personal precautions, protect	ive equipment and emergency procedures
For non-emergency personnel	Contact emergency personnel. No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilt material. Provide adequate ventilation. Put on appropriate personal protective equipment. Floors may be slippery; use care to avoid falling.
For emergency responders	<b>F</b> specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".
Environmental precautions	Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air). Water polluting material. May be harmful to the environment if released in large quantities.
Methods and material for cont	ainment and cleaning up
Small spill	Move containers from spill area. Vacuum or sweep up material and place in a designated, labelled waste container. Dispose of via a licensed waste disposal contractor.
Large spill	Move containers from spill area. Approach the release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Vacuum or sweep up material and place in a designated, labelled waste container. Avoid creating dusty conditions and prevent wind dispersal. If emergency personnel are unavailable, contain spilt material. Suction or scoop the spill into appropriate disposal or recycling vessels, then cover spill area with oil absorbent. Dispose of via a licensed waste disposal contractor. Avoid dust generation. Do not dry sweep. Vacuum dust with equipment fitted with a HEPA filter and place in a closed, labeled waste container.

# Section 7. Handling and storage

Precautions for safe handling	
Protective measures	Fut on appropriate personal protective equipment (see Section 8). Do not get in eyes or on skin or clothing. Do not ingest. If during normal use the material presents a respiratory hazard, use only with adequate ventilation or wear appropriate respirator. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container. Avoid contact of spilt material and runoff with soil and surface waterways.
Advice on general occupational hygiene	Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Wash thoroughly after handling. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.
Conditions for safe storage	Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Keep away from heat and direct sunlight. Keep container tightly closed and sealed until ready for use. Store and use only in equipment/containers designed for use with this product. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination.
Not suitable	Prolonged exposure to elevated temperature

Product name Er	nergrease EP 2	Product	code 46	9944-ZA01	Page: 3/8
Version 2	Date of issue 10/03/2020.	Format GHS -	South Afr	rica Languag	e ENGLISH
		Build 6.1.0 (GHS	- Default)		(ENGLISH)

### Section 8. Exposure controls/personal protection

#### Control parameters

**Occupational exposure limits** 

Ingredient name	Exposure limits
Base oil - unspecified	ACGIH TLV (United States).
	TWA: 5 mg/m <sup>3</sup> 8 hours. Issued/Revised:
	11/2009 Form: Inhalable fraction
Distillates (petroleum), hydrotreated heavy naphthenic	ACGIH TLV (United States).
	TWA: 5 mg/m <sup>3</sup> 8 hours. Issued/Revised:
	11/2009 Form: Inhalable fraction
calcium carbonate	DOL OEL (South Africa).
	TWA: 5 mg/m <sup>3</sup> 8 hours. Issued/Revised:
	8/1995 Form: Respirable dust
	TWA: 10 mg/m <sup>3</sup> 8 hours. Issued/Revised:
	8/1995 Form: total inhalable dust

Whilst specific OELs for certain components may be shown in this section, other components may be present in any mist, vapour or dust produced. Therefore, the specific OELs may not be applicable to the product as a whole and are provided for guidance only.

Recommended monitoring procedures	If this product contains ingredients with exposure limits, personal, workplace atmosphere or biological monitoring may be required to determine the effectiveness of the ventilation or other control measures and/or the necessity to use respiratory protective equipment. Reference should be made to appropriate monitoring standards. Reference to national guidance documents for methods for the determination of hazardous substances will also be required.
Appropriate engineering controls	Provide exhaust ventilation or other engineering controls to keep the relevant airborne concentrations below their respective occupational exposure limits. All activities involving chemicals should be assessed for their risks to health, to ensure exposures are adequately controlled. Personal protective equipment should only be considered after other forms of control measures (e.g. engineering controls) have been suitably evaluated. Personal protective equipment should conform to appropriate standards, be suitable for use, be kept in good condition and properly maintained. Your supplier of personal protective equipment should be consulted for advice on selection and appropriate standards. For further information contact your national organisation for standards. The final choice of protective equipment will depend upon a risk assessment. It is important to ensure that all items of personal protective equipment are compatible.
Environmental exposure controls	Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.
Individual protection measures	
Hygiene measures	Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.
Eye protection	Recommended: safety glasses with side-shields
Skin protection	
Hand protection	Wear protective gloves if prolonged or repeated contact is likely. Wear chemical resistant gloves. Recommended: Nitrile gloves. The correct choice of protective gloves depends upon the chemicals being handled, the conditions of work and use, and the condition of the gloves (even the best chemically resistant glove will break down after repeated chemical exposures). Most gloves provide only a short time of protection before they must be discarded and replaced. Because specific work environments and material handling practices vary, safety procedures should be developed for each intended application. Gloves should therefore be chosen in consultation with the supplier/manufacturer and with a full assessment of the working conditions.

Product name Er	ergrease EP 2	Product co	de 469944-ZA0	01 Page: 4/8
Version 2	Date of issue 10/03/2020.	Format GHS - So	outh Africa	Language ENGLISH
		Build 6.1.0 (GHS - De	efault)	(ENGLISH)

#### Section 8. Exposure controls/personal protection

Skin protection	Lies of protective elething is good industrial practice
Skin protection	Use of protective clothing is good industrial practice. Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. Cotton or polyester/cotton overalls will only provide protection against light superficial contamination that will not soak through to the skin. Overalls should be laundered on a regular basis. When the risk of skin exposure is high (e.g. when cleaning up spillages or if there is a risk of splashing) then chemical resistant aprons and/or impervious chemical suits and boots will be required.
Other skin protection	Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.
Respiratory protection	In case of insufficient ventilation, wear suitable respiratory equipment. For protection against metal working fluids, respiratory protection that is classified as "resistant to oil" (class R) or oil proof (class P) should be selected where appropriate. Depending on the level of airborne contaminants, an air-purifying, half-mask respirator (with HEPA filter) including disposable (P- or R-series) (for oil mists less than 50mg/m3), or any powered, air-purifying respirator equipped with hood or helmet and HEPA filter (for oil mists less than 125 mg/m3). Where organic vapours are a potential hazard during metalworking operations, a combination particulate and organic vapour filter may be necessary. The correct choice of respiratory protection depends upon the chemicals being handled, the conditions of work and use, and the condition of the respiratory equipment. Safety procedures should be developed for each intended application. Respiratory protection equipment should therefore be chosen in consultation with the supplier/manufacturer and with a full assessment of the working conditions.

# Section 9. Physical and chemical properties

Appearance
------------

Physical state	Grease
Colour	Amber.
Odour	Not available.
Odour threshold	Not available.
рН	Not available.
Melting point	Not available.
Boiling point	Not available.
Drop Point	>190 °C
Flash point	Not available.
Evaporation rate	Not available.
Flammability (solid, gas)	Not applicable. Based on - Physical state
Lower and upper explosive (flammable) limits	Not available.
Vapour pressure	Not available.
Vapour density	Not available.
Relative density	Not available.
Density	<1000 kg/m³ (<1 g/cm³)
Solubility	insoluble in water.
Partition coefficient: n- octanol/water	Not available.
Auto-ignition temperature	Not available.
Decomposition temperature	Not available.
Viscosity	Kinematic: 167.2 mm²/s (167.2 cSt) at 40°C

Product name En	ergrease EP 2	Product code 46994	4-ZA01 Page: 5/8
Version 2	Date of issue 10/03/2020.	Format GHS - South Africa	Language ENGLISH
		Build 6.1.0 (GHS - Default)	(ENGLISH)

# Section 10. Stability and reactivity

No specific test data available for this product. Refer to Conditions to avoid and Incompatible materials for additional information.
The product is stable.
Under normal conditions of storage and use, hazardous reactions will not occur. Under normal conditions of storage and use, hazardous polymerisation will not occur.
Avoid all possible sources of ignition (spark or flame).
Reactive or incompatible with the following materials: oxidising materials.
Under normal conditions of storage and use, hazardous decomposition products should not be produced.

# Section 11. Toxicological information

Information on toxicological e	effects		
Aspiration hazard			
Not available.			
Information on likely routes of exposure	Routes of entry anticipated: Dermal, Inhalation.		
Potential acute health effects			
Eye contact	Causes serious eye damage.		
Inhalation	May give off gas, vapour or dust that is very irritating or corrosive to the respiratory system.		
Skin contact	Defatting to the skin. May cause skin dryness and irritation.		
Ingestion	May cause burns to mouth, throat and stomach.		
Symptoms related to the phys	sical, chemical and toxicological characteristics		
Eye contact	Adverse symptoms may include the following: pain watering redness		
Inhalation	No specific data.		
Skin contact	Adverse symptoms may include the following: irritation dryness cracking		
Ingestion	Adverse symptoms may include the following: stomach pains		
Delayed and immediate effect	<u>s as well as chronic effects from short and long-term exposure</u>		
Skin contact	Prolonged or repeated contact can defat the skin and lead to irritation, cracking and/ or dermatitis.		
Potential chronic health effe	<u>cts</u>		
General	No known significant effects or critical hazards.		
Carcinogenicity	No known significant effects or critical hazards.		
Mutagenicity	No known significant effects or critical hazards.		
Teratogenicity	No known significant effects or critical hazards.		
<b>Developmental effects</b>	No known significant effects or critical hazards.		
Fertility effects	No known significant effects or critical hazards.		

### Section 12. Ecological information

Environmental effects	This material is harmful to aquatic life with long lasting effects.
Persistence and	
<u>degradability</u>	
Expected to be biodegradable.	
<b>Bioaccumulative potential</b>	
This product is not expected to b	ioaccumulate through food chains in the environment.
Mobility	Spillages are unlikely to penetrate the soil.
Other adverse effects	No known significant effects or critical hazards.
Other ecological information	This product is unlikely to disperse in water.

Product name	Energrease EP 2	Product code 4699	44-ZA01 Page: 6/8
Version 2	Date of issue 10/03/2020.	Format GHS - South Africa	a Language ENGLISH
		Build 6.1.0 (GHS - Default)	(ENGLISH)

### Section 13. Disposal considerations

Disposal methods

The generation of waste should be avoided or minimised wherever possible. Significant quantities of waste product residues should not be disposed of via the foul sewer but processed in a suitable effluent treatment plant. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers.

### Section 14. Transport information

	IMDG	ΙΑΤΑ
UN number	Not regulated.	Not regulated.
UN proper shipping name	-	-
Transport hazard class(es)	-	-
Packing group	-	-
Environmental hazards	No.	No.
Additional information	-	-

Special precautions for user Not available.

Transport in bulk according Not available. to Annex II of Marpol and the IBC Code

### Section 15. Regulatory information

Regulation according to othe	r foreign laws	
REACH Status	For the REACH status of this product please consult your company contact, as identified Section 1.	
Australia inventory (AICS)	All components are listed or exempted.	
Canada inventory status	At least one component is not listed in DSL but all such components are listed in NDSL.	
China inventory (IECSC)	All components are listed or exempted.	
Japan inventory (ENCS)	All components are listed or exempted.	
Korea inventory (KECI)	All components are listed or exempted.	
Philippines inventory (PICCS)	All components are listed or exempted.	
Taiwan Chemical Substances Inventory (TCSI)	Not determined.	
United States inventory (TSCA 8b)	Not determined.	
South Africa		
National regulations	National legislation: Occupational Health and Safety Act (Act 85 of 1993).

#### Notice to reader

All reasonably practicable steps have been taken to ensure this data sheet and the health, safety and environmental information contained in it is accurate as of the date specified below. No warranty or representation, express or implied is made as to the accuracy or completeness of the data and information in this data sheet.

The data and advice given apply when the product is sold for the stated application or applications. You should not use the product other than for the stated application or applications without seeking advice from BP Group.

It is the user's obligation to evaluate and use this product safely and to comply with all applicable laws and regulations. The BP Group shall not be responsible for any damage or injury resulting from use, other than the stated product use of the material, from any failure to adhere to recommendations, or from any hazards inherent in the nature of the material. Purchasers of the product for supply to a third party for use at work, have a duty to take all necessary steps to ensure that any person handling or using the product is provided with the information in this sheet. Employers have a duty to tell employees and others who may be affected of any hazards described in this sheet and of any precautions that should be taken. You can contact the BP Group to ensure that this document is the most current available. Alteration of this document is strictly prohibited.
